

# Common Nutrient Deficiencies

J. Corp Corporation specialized in agricultural soil reconditioning, pest control, and plant nutrient deficiencies. Our products can improve farmers' yield rate with minimum cost and efforts. Please contact us for any questions.

1. Normal leaf growth
2. Early sign of Nitrogen Deficiency (old leaves are reabsorbed from tip to stem)
3. Severe Nitrogen Deficiency (white/yellow tiny leaves)
4. Iron Deficiency (yellowing of entire plant)
5. Calcium/Traces Deficiency (or might be K, Mg overdose) twisted pale new growth
6. Phosphate Deficiency (older leaves yellow and reabsorbed leading to dead patches, the leaf tissue)
7. Magnesium Deficiency (dark veins lighter leaf tissue)
8. Potassium Deficiency (pin-holes form in leaf that enlarge with a yellowing edge, leaf is otherwise normal looking)

## Symptoms
